First Look at the Revolutionary, Decentralized Cryptocurrency Greencoin, Created 1/1/2022
Greencoin, Branded the Future of Cryptocurrency, Claims to Become the World's Staple Currency.

Created at 12AM PT on January 1st, 2022, at the time of writing there are just over 100 Greencoin. Built in the spirit of Bitcoin, the ambitious cryptocurrency offers instant verification and fee free transactions on a secure and scalable peer-to-peer network. The goal of Greencoin: become the most circulated currency in the world. How could a cryptocurrency hope to become the world's premiere currency? The sole creator, Wang Yong Chan, shares his insights:

"Bitcoin was built after the 2008 financial catastrophe that shocked markets around the world. People lost confidence in traditional currency and were looking for a decentralized alternative. It's been 13 years since Bitcoin's creation but it failed to protect the world's financial markets from retraction after COVID-19. Greencoin is the future because it solves the problems cryptocurrencies face while fulfilling Satoshi Nakamoto's vision of a decentralized medium of exchange; scalability, power consumption and ease of access."

When questioned on his anonymity, Wang Yong Chan responded: "Satoshi Nakamoto knew that any correlation to his personal identity and Bitcoin would detract from the purpose of the cryptocurrency. Greencoin has a similar goal and approach."

The **Greencoin Whitepaper** can be found @ **github.com/wangyongchan/Greencoin** and details the protocol behind the cryptocurrency which details:
- A scalable peer-to-peer network based on user dependent configurations. The modern message system and connection types are ideal for application developers while offering the users fee-free transactions that can be instantly verified by users with the full ledger.
- 1 new coin every hour proportionately invested into the user base, minimal processing usage and encoded message delivery capabilities.

Check out the Greencoin Twitter **@Greencoin_** for all Greencoin links and information. Join the conversation on Telegram **@Greencoin_crypto**. The first Greencoin application, **Greencoin v0.0** has been announced to be released by January 9th, 2022, more information about which is on the Greencoin Github.
